## PROJECTS / Magento Extensions

### **Portfolio** — Professional Developer's Portfolio Website Template

Created a fully responsive Developer's Portfolio template using basic react components and tailwind css to showcase my professional career path and skills.

**Tools:** Reactjs, Tailwind, GitHub Actions

### **Store Locator** — Magento 2 Extension

Admin functionality to add physical store locations with integrated google map api.

**Tools:** Magento 2, Google Map API

### **Dealer Locator** — Magento 2 Extension

Similar to **Store Locator**, but the customers signed up as **Dealer** while registration can add their physical store locations shown on frontend subjected to the admin approvals.

**Tools:** Magento 2, Google Map API, Inventory Management

## SMS Notification — Magento 2 Extension

Allows the store admin to be able to send SMS notifications to the customers on several events like Order creation, Signup, Login, etc. using **Twilio**, **MSG91** and **Textlocal** APIs.

**Tools:** Magento 2, API Integration

## Store Pickup — Magento 2 Extension

Customers can select one of the store locations at the checkout page defined by admin, to pick up their orders.

**Tools:** Magento 2, Admin Configurations
